Mike Hou

Android App Developer | Kotlin | Jetpack Compose | Privacy-Focused Mobile Applications

Cary, NC 27519 | 919-985-3895 | houhyi@gmail.com | Android App Portfolio

PROFESSIONAL SUMMARY

Android Kotlin developer and senior software professional with more than 25 years of application and data-system experience. Developed seven Android applications from March through September 2026 and published them on the Google Play Store using Kotlin, Jetpack Compose, Room, and Material 3. Hands-on mobile experience includes application design and development, responsive user interfaces, local data storage, privacy-focused on-device processing, local Wi-Fi communication, camera and media applications, background recording, and Google Play release. Extensive enterprise background in Agile development, Git version control, production support, Java, Python, databases, and collaboration with distributed teams. Based in Cary, North Carolina.

TECHNICAL SKILLS

Android Development: Kotlin, Jetpack Compose, Room, Material 3, Android application development, Google Play Store publishing

Mobile Capabilities: Local Wi-Fi communication, live video and audio, two-way talk, photo/video/audio capture and playback, background recording, offline and on-device processing, local storage

Application Features: Responsive user interfaces, document scanning, PDF creation, motion detection, search and filtering, backup and restore, storage management, sharing and export

Development Practices: Agile development, Git, GitHub, Jira, requirements analysis, data validation, production support, issue resolution

Programming and Data: Java, Python, PL/SQL, SQL, T-SQL, JDBC, Oracle, AWS RDS for Oracle, Microsoft SQL Server

PROFESSIONAL EXPERIENCE

Independent Android Kotlin Developer | Published Application Portfolio

Cary, NC | Mar 2026 – Present

- Designed and developed seven Kotlin Android applications from March through September 2026, completing one application per month and publishing the portfolio on the Google Play Store.
- Took applications from product concept through implementation and Google Play publication using Kotlin, Jetpack Compose, Room, and Material 3.
- Built privacy-focused workflows using offline or on-device processing, local storage, and local Wi-Fi communication without requiring cloud services or user accounts where applicable.
- Implemented live video and audio, two-way talk, photo/video/audio capture and playback, front/rear/dual-camera recording, motion-triggered video, and background or screen-off recording.
- Developed user-facing features including document scanning, automatic page-edge detection, PDF generation, search, backup and restore, storage rotation, clip protection, sharing, and export.

ENVIRONMENT Kotlin; Android; Jetpack Compose; Room; Material 3; Git; GitHub; Google Play Store

Published Android Applications

- **LullabyCam and RecPro** — Local Wi-Fi baby monitor and background audio recorder featuring live video and audio, two-way talk, private local media, search, storage management, sharing, and export.

- **eDog and RoadCam** — Privacy-focused security-camera and dashcam applications featuring motion detection, audio, front/rear/dual-camera video, background recording, storage rotation, clip protection, playback, and export.
- **PathLog, ClockPro, and FormSnap** — Travel-journal, clock, and document-scanning applications featuring offline text recognition and translation, on-device processing, local data, camera-based capture, and PDF creation.

Senior Systems Analyst | CURI Medical Mutual Insurance

Raleigh, NC | Sep 2014 – Mar 2026

- Developed and supported enterprise applications and nightly ETL processes using PL/SQL, Java, and Python in an Agile team using Jira, GitHub, and Git version control.
- Designed reusable application and database components and performed data processing and validation for policy, data warehouse, data mart, operational, and regulatory-reporting workflows.
- Built product-definition packages that configured insurance products across 47 states and inserted more than 3 million records to support market expansion and underwriting requirements.
- Administered AWS RDS for Oracle databases, including snapshots, schema backups, and production-to-development and test environment refreshes.

Senior Web Technologist | Sanmina

Raleigh, NC and Huntsville, AL | Jun 2004 – Aug 2014

- Developed and supported Java- and SQL-based applications and automated ETL processes serving global supply-chain teams, manufacturing plants, and Oracle ERP.
- Translated business requirements into application logic, data rules, and reports and provided backend production support to distributed development teams in India and Mexico.

Earlier Experience

- **Senior Programmer, UNIREX Corporation** | Huntsville, AL | May 2000 – Jun 2004 — Developed web and inventory applications using Java and maintained their Microsoft SQL Server database.
- **Senior Programmer, Huayuan Investment Group** | Beijing, China | Aug 1996 – Jul 1998 — Developed and supported an Oracle-based futures trading platform.
- **Programmer, First Grinding Wheel Factory** | Shenyang, China | Aug 1990 – Jul 1993 — Developed and supported a human resources application.

EDUCATION

- **Master of Science in Computer Science**, University of Alabama in Huntsville, 2001 | GPA 3.8/4.0
- **Master of Engineering in Computer Engineering**, Sichuan University, 1996
- **Bachelor of Arts in Computer Application**, Xidian University, 1990
