Mike Hou

Software Engineer – Mobile Development | Android Kotlin | Jetpack Compose

Cary, NC 27519 | 919-985-3895 | houhyi@gmail.com | Android App Portfolio

PROFESSIONAL SUMMARY

Android Kotlin developer and software professional based in Cary, North Carolina, with more than 25 years of experience building and supporting applications and enterprise systems. Developed seven consumer-facing Android applications from March through September 2026 and published them on the Google Play Store using Kotlin, Jetpack Compose, Room, and Material 3. Mobile work includes user-friendly interfaces, camera and media applications, live video and audio, background recording, local storage, offline processing, local Wi-Fi communication, search, backup, sharing, and export. Extensive background in Java and Python development, Agile delivery, Git version control, requirements analysis, production support, and reliable enterprise applications.

TECHNICAL SKILLS

- **Mobile Development:** Kotlin, Android application development, Jetpack Compose, Room, Material 3, Google Play Store publishing
- **Consumer Application Features:** Responsive user interfaces, photo/video/audio capture and playback, live video and audio, camera applications, background recording, local Wi-Fi communication
- **Application Capabilities:** Offline and on-device processing, local data storage, document scanning, PDF creation, motion detection, search and filtering, backup and restore, storage management, sharing and export
- **Programming and Tools:** Kotlin, Java, Python, Git, GitHub, Jira, PL/SQL, SQL, T-SQL, JDBC
- **Software and Data Engineering:** Agile development, requirements analysis, data validation, scheduled processing, production support, ETL, data integration, Oracle, AWS RDS for Oracle, Microsoft SQL Server

PROFESSIONAL EXPERIENCE

Independent Android Kotlin Developer | Published Application Portfolio

Cary, NC | Mar 2026 – Present

- Designed and developed seven consumer-facing Kotlin Android applications from March through September 2026, completing one application per month and publishing the portfolio on the Google Play Store.
- Created new application functionality from product concept through implementation and release using Kotlin, Jetpack Compose, Room, and Material 3.
- Developed mobile experiences spanning travel, productivity, document scanning, home security, automotive video, audio recording, and family monitoring.
- Implemented photo, video, and audio capture and playback; front/rear/dual-camera recording; motion-triggered video; live video and audio; two-way talk; and background or screen-off recording.
- Built offline and on-device workflows for text recognition and translation, document processing, PDF generation, local storage, search, backup and restore, storage rotation, sharing, and export.

Environment: Kotlin; Android; Jetpack Compose; Room; Material 3; Git; GitHub; Google Play Store

Published Android Applications

- **PathLog, ClockPro, and FormSnap** — Consumer travel, clock, and document-scanning applications featuring offline text recognition and translation, customizable interfaces, camera-based capture and editing, and PDF creation.
- **eDog and RoadCam** — Security-camera and dashcam applications featuring motion detection, audio, front/rear/dual-camera video, background recording, storage rotation, clip protection, playback, and export.
- **RecPro and LullabyCam** — Background audio recorder and local Wi-Fi baby monitor featuring searchable local media, live video and audio, two-way talk, storage management, sharing, and export.

Senior Systems Analyst | CURI Medical Mutual Insurance

Raleigh, NC | Sep 2014 – Mar 2026

- Developed and supported enterprise applications and scheduled ETL processes using Java, Python, and PL/SQL in an Agile team using Git, GitHub, and Jira.
- Translated business requirements into reliable application and data components and performed data processing and validation for policy, operational, data warehouse, data mart, and regulatory-reporting workflows.
- Built product-definition packages that configured insurance products across 47 states and inserted more than 3 million records to support market expansion and underwriting requirements.
- Administered AWS RDS for Oracle databases, including snapshots, backups, and production-to-development and test environment refreshes.

Senior Web Technologist | Sanmina

Raleigh, NC and Huntsville, AL | Jun 2004 – Aug 2014

- Developed and supported Java- and SQL-based applications and automated ETL processes serving global supply-chain teams, manufacturing plants, and Oracle ERP.
- Translated business requirements into application logic, data rules, and reports and provided backend production support to distributed development teams in India and Mexico.

Earlier Experience

- **Senior Programmer, UNIREX Corporation** | Huntsville, AL | May 2000 – Jun 2004 — Developed Java-based web and inventory applications and maintained their Microsoft SQL Server database.
- **Senior Programmer, Huayuan Investment Group** | Beijing, China | Aug 1996 – Jul 1998 — Developed and supported an Oracle-based futures trading platform.
- **Programmer, First Grinding Wheel Factory** | Shenyang, China | Aug 1990 – Jul 1993 — Developed and supported a human resources application.

EDUCATION

- **Master of Science in Computer Science**, University of Alabama in Huntsville, 2001 | GPA 3.8/4.0
- **Master of Engineering in Computer Engineering**, Sichuan University, 1996
- **Bachelor of Arts in Computer Application**, Xidian University, 1990
