Mike Hou

Android Developer | Kotlin | Jetpack Compose | Room | Material 3

Cary, NC 27519 | 919-985-3895 | houhyi@gmail.com | Android App Portfolio

PROFESSIONAL SUMMARY

Android Kotlin developer and senior software professional with more than 25 years of application and data-system experience. Developed and published seven Android applications on the Google Play Store from March through September 2026 using Kotlin, Jetpack Compose, Room, and Material 3. Hands-on mobile experience includes responsive user interfaces, camera and media applications, background recording, offline and on-device processing, local storage, local Wi-Fi communication, search, backup, sharing, and export. Extensive enterprise background in application development, Agile delivery, production support, data validation, Java, Python, GitHub, and Jira.

TECHNICAL SKILLS

- **Android:** Kotlin, Jetpack Compose, Room, Material 3, Android application development, Google Play Store publishing
- **Mobile Features:** Responsive user interfaces, photo/video/audio capture and playback, camera applications, background recording, local Wi-Fi communication, offline and on-device processing, PDF creation, local storage
- **Application Quality:** Data validation, production support, issue resolution, application reliability, scheduled processing, Agile development
- **Programming and Tools:** Java, Python, Git, GitHub, Jira, PL/SQL, SQL, T-SQL, JDBC
- **Data Platforms:** Oracle, AWS RDS for Oracle, Microsoft SQL Server, ETL, data integration, data migration

PROFESSIONAL EXPERIENCE

Independent Android Kotlin Developer | Published Application Portfolio

Cary, NC | Mar 2026 – Present

- Designed, developed, and published seven Kotlin Android applications on the Google Play Store from March through September 2026, delivering one production application per month.
- Built user interfaces with Jetpack Compose and Material 3 and used Room for local application data across a portfolio spanning travel, productivity, security, automotive, audio, and home monitoring.
- Implemented mobile media capabilities including photo, video, and audio capture and playback; front-, rear-, and dual-camera recording; motion-triggered video; live video and audio; two-way talk; and background or screen-off recording.
- Developed offline and on-device workflows for text recognition and translation, document scanning, automatic page-edge detection, image editing, PDF generation, search, backup and restore, storage rotation, sharing, and export.
- Delivered privacy-focused features using local storage and local Wi-Fi communication, including a two-phone baby monitor that does not require a cloud service or user account.

Environment: Kotlin; Android; Jetpack Compose; Room; Material 3; Google Play Store

Published Android Applications

- **PathLog, ClockPro, and FormSnap** *(Mar–May 2026)* — Travel-journal, always-on clock, and document-scanning applications featuring offline text recognition and translation, configurable clocks and alarms, camera-based page capture and editing, and PDF creation.
- **eDog and RoadCam** *(Jun–Jul 2026)* — Security-camera and dashcam applications featuring motion detection, audio, front/rear/dual-camera video, background recording, storage rotation, clip protection, playback, sharing, and export.
- **RecPro and LullabyCam** *(Aug–Sep 2026)* — Background audio recorder and local Wi-Fi baby monitor featuring searchable local media, storage management, live video and audio, two-way talk, lullabies, and white noise.

Senior Systems Analyst | CURI Medical Mutual Insurance

Raleigh, NC | Sep 2014 – Mar 2026

- Developed and supported enterprise applications and nightly ETL processes using PL/SQL, Java, and Python in an Agile team using Jira, GitHub, and established production-support practices.
- Designed reusable database components and performed data processing and validation for policy, data warehouse, data mart, operational, and regulatory-reporting workflows.
- Built product-definition packages that configured insurance products across 47 states and inserted more than 3 million records to support market expansion and underwriting requirements.
- Administered AWS RDS for Oracle databases, including snapshots, schema backups, and production-to-development and test environment refreshes.

Environment: Java; Python; Oracle 11g, 12c, 19c; AWS RDS for Oracle; PL/SQL; Git; GitHub; Jira

Senior Web Technologist | Sanmina

Raleigh, NC and Huntsville, AL | Jun 2004 – Aug 2014

- Developed and supported Java- and SQL-based applications and automated ETL processes serving global supply-chain teams, manufacturing plants, and Oracle ERP.
- Translated business requirements into application logic, data rules, and reports while providing backend production support to distributed development teams.

Earlier Experience

- **Senior Programmer, UNIREX Corporation** | Huntsville, AL | May 2000 – Jun 2004 — Developed web and inventory applications in Java and maintained their SQL Server database.
- **Senior Programmer, Huayuan Investment Group** | Beijing, China | Aug 1996 – Jul 1998 — Developed and supported an Oracle-based futures trading platform.
- **Programmer, First Grinding Wheel Factory** | Shenyang, China | Aug 1990 – Jul 1993 — Developed and supported a human resources application.

EDUCATION

- **Master of Science in Computer Science**, University of Alabama in Huntsville, 2001 | GPA 3.8/4.0
- **Master of Engineering in Computer Engineering**, Sichuan University, 1996
- **Bachelor of Arts in Computer Application**, Xidian University, 1990
