Mike Hou

Android Kotlin Developer | Mobile Applications | Data and Database Engineering

Cary, NC 27519 | 919-985-3895 | houhyi@gmail.com | Android App Portfolio

PROFESSIONAL SUMMARY

Android Kotlin developer and senior software and database professional with more than 25 years of experience building reliable applications, data systems, ETL processes, and operational solutions. Developed 10 Kotlin Android applications from March through October 2026 using Jetpack Compose, Room, and Material 3; nine are published on the Google Play Store and one is in review. Recent mobile work spans camera, video, audio, screen recording and editing, augmented-reality measurement, calendar and event management, document scanning, PDF creation, offline text recognition and translation, background recording, local Wi-Fi communication, on-device storage, search, backup, sharing, and export. Deep enterprise experience in Java, Python, Oracle PL/SQL, SQL Server, and AWS RDS for Oracle. Bilingual in English and Mandarin Chinese.

TECHNICAL SKILLS

- **Android Development:** Kotlin, Jetpack Compose, Room, Material 3, Android application development, Google Play Console publishing, privacy policies, one-time premium feature unlocks, offline and on-device processing
- **Mobile Application Features:** Photo, video, audio, screen, and screenshot capture; video trimming, cropping, and rotation; augmented-reality and on-screen measurement; document scanning and PDF creation; calendar views, reminders, recurring events, search, backup, sharing, and export
- **Programming and Data:** Kotlin, Java, Python, PL/SQL, SQL, T-SQL, JDBC, ETL, data processing, data validation, data conversion, data migration
- **Databases and Tools:** Oracle 7, 8i, 10g, 11g, 12c, 19c; AWS RDS for Oracle; SQL Server 7, 2000, 2012; SQL*Plus; SQLCMD; Toad; Git; GitHub; Jira

PROFESSIONAL EXPERIENCE

Independent Android Kotlin Developer | Published Application Portfolio

Cary, NC | Mar 2026 - Present

- Developed 10 Kotlin Android applications from March through October 2026 across travel, productivity, security, automotive, audio, home-monitoring, measurement, calendar, and screen-recording use cases; published nine on the Google Play Store, with one in review.
- Built privacy-focused mobile workflows using offline or on-device processing, secure local storage, and local Wi-Fi communication without requiring cloud services or user accounts where applicable.
- Implemented multimedia capabilities including photo, video, audio, screen, and screenshot capture; front-, rear-, and dual-camera recording; motion-triggered video; live video and audio; two-way talk; background or screen-off recording; and video trimming, cropping, and rotation.
- Developed document and content-management features including automatic page-edge detection, crop and rotation tools, image enhancement options, PDF generation, search and filtering, backup and restore, storage rotation, clip protection, sharing, and export.
- Created configurable experiences for augmented-reality and on-screen measurement, month/week/day calendars, schedules, reminders, recurring events, clocks, alarms, timers, world-city tracking, themes, and night modes.
- Prepared Google Play Store listings and privacy policies and configured one-time premium products for feature and usage-limit unlocks.

Environment: Kotlin; Android; Jetpack Compose; Room; Material 3; Google Play Store

Google Play Applications

PathLog: Travel Log Timeline *(Mar 2026)* — Travel journal for organizing photos, videos, notes, places, and timelines, with offline text recognition and translation, search, filtering, backup, restore, and export.

ClockPro: elegant & always on *(Apr 2026)* — Customizable always-on clock with world cities, alarms, timer, stopwatch, sleep tools, sunrise and sunset information, themes, and Night Mode.

FormSnap: fast document scan *(May 2026)* — Document scanner and PDF creator with automatic page-edge detection, cropping, rotation, straightening, retakes, image modes, and configurable PDF size, quality, and margins.

eDog: Motion & Bark Watch Dog *(Jun 2026)* — Motion-detection security camera with audio, motion-triggered video recording, playback, sharing, export, Night Mode, and configurable alert sounds.

RoadCam: road & cabin dashcam *(Jul 2026)* — Road and cabin dashcam with front-, rear-, and dual-camera recording, background recording, automatic storage rotation, clip protection, microphone audio, playback, and recording management.

RecPro: lecture & audio record *(Aug 2026)* — Background audio recorder and searchable library with pause and resume, storage limits, automatic rotation, protection, sharing, export, and private local storage.

LullabyCam: wi-fi baby monitor *(Sep 2026)* — Local Wi-Fi baby monitor connecting two Android phones with live video and audio, two-way talk, push-to-talk, lullabies, white noise, and nature sounds without a cloud service or account.

PowerRuler: AR & Screen Ruler *(Oct 2026)* — Measurement utility with an on-screen ruler, inch and centimeter units, camera-based augmented-reality distance estimates, and three-point triangle measurement.

CalendarPro: Time Beautifully *(Oct 2026)* — Customizable calendar with month, week, and day views, a live clock, upcoming events, countdowns, reminders, recurring events, themes, colors, and photos.

PixelRec: Screen Recorder *(Oct 2026; Google Play review)* — Screen and screenshot recorder with audio, sharing, video trimming, premium crop and rotation tools, and recording up to 1080p at 60 FPS.

Senior Systems Analyst | CURI Medical Mutual Insurance

Raleigh, NC | Sep 2014 - Mar 2026

- Administered AWS RDS for Oracle databases, including snapshot management, schema backups, and production-to-development and test environment refreshes.
- Developed and maintained PL/SQL packages, stored procedures, and functions for nightly ETL processes supporting The Legacy Fund, Dividend, monthly policy renewals, the enterprise data warehouse, and the Milliman Datalytics application.
- Designed and supported database packages, procedures, functions, triggers, tables, and views for annual fund allocation, quarterly statement generation, and data mart refreshes.
- Built Oasis Product Definition packages that configured insurance products across 47 states and inserted more than 3 million records to support market expansion and underwriting requirements.
- Created PL/SQL packages and object types to migrate HPIX client and entity data and IS4W claim data into the Oasis platform.
- Developed stored procedures for the Claim 100 Comprehensive Report and prepared data for NJ ISO reports and New Jersey Department of Banking filings.
- Worked in an Agile team using Jira and GitHub; supported Oracle data marts analytics and completed development work in Java and Python.

Environment: Oracle 11g, 12c, 19c; AWS RDS for Oracle; PL/SQL; Python; Java; Toad; Git; GitHub; Jira

Senior Web Technologist | Sanmina

Raleigh, NC and Huntsville, AL | Jun 2004 - Aug 2014

- Developed an automated ETL process that delivered supply chain data to the QuoteWin and SupplyWin web applications using Java, SQL*Plus, PL/SQL, Transact-SQL, and SQLCMD.
- Supported scheduled ETL operations, improved processing accuracy, and provided backend support to web development teams in India and Mexico.
- Translated requirements from the Operations Analysis team into ETL business rules and reports for senior vice presidents, global supply chain managers, manufacturing plants, and Oracle ERP.
- Developed PL/SQL stored procedures, functions, and packages for Total Available Market analysis and the QuoteWin application.

Environment: Oracle 10g, 11g; PL/SQL; T-SQL; Java; SQL Server 2000; SQL*Plus; SQLCMD

Senior Programmer | UNIREX Corporation

Huntsville, AL | May 2000 - Jun 2004

- Developed the UniPoll website, UNIREX Watch Center, and an intranet tank inventory posting service for Valspar, Westway, and Kinder Morgan Terminal Company.
- Designed, created, and maintained the UniPoll SQL Server database.

Environment: Oracle 8i; PL/SQL; Java; JDBC; T-SQL; SQL Server 7 and 2000

Senior Programmer | Huayuan Investment Group

Beijing, China | Aug 1996 - Jul 1998

- Developed and supported a futures trading platform using Oracle 7 and PL/SQL.

Programmer | First Grinding Wheel Factory

Shenyang, China | Aug 1990 - Jul 1993

- Developed and supported a human resources application using dBASE III.

EDUCATION

- **Master of Science in Computer Science**, University of Alabama in Huntsville, 2001 | GPA 3.8/4.0
- **Master of Engineering in Computer Engineering**, Sichuan University, Chengdu, China, 1996
- **Bachelor of Arts in Computer Application**, Xidian University, Xi'an, China, 1990

PROFESSIONAL TRAINING

- Toad for Oracle Fundamentals and Toad for Oracle DBAs Database Maintenance, 2014
- SQL Server 2012 Training, 2014
